GDPR Tech

Information Governance, Privacy & AI Governance

GDPR Tech is a Finnish consultancy specialising in information governance, privacy, and AI governance. We help public and private sector organisations improve data governance, manage risk, prepare for AI adoption, and govern complex information environments.

GDPR Tech specialises in the assessment, governance, and management of large-scale unstructured data environments, including file shares, document repositories, and collaborative platforms. We support organisations in reducing information risk, improving compliance, implementing information lifecycle management controls, and preparing data estates for cloud and AI-enabled environments.
